

Description

Suite[®] WIK is an ultra-absorbent spill device available for use in cleanrooms. The WIK combines high capillary action with significant surface area capacity resulting in unmatched absorbency and liquid hold potential. WIK does not just contain the spill, it removes it. The Suite WIK is available in both gamma-irradiated and non-sterile configurations making it the ideal choice for all your manufacturing environments.

Product Information

Part #:

1. Sterilized: Y-SCK40-25-IR
2. Non-Sterile: Y-SCK40-25

Packaging:

1. 1 per double bag, 25 per case
2. 1 per bag, 25 per case

Description: 40" long, super absorbent spill device

Color: White

Product Performance

Reduction and Transfer: Wiping with Suite material has been demonstrated to *effectively remove surface contamination. In addition, the carry-over (cross contamination potential) after wiping with the Suite material is minimized as contaminants are fully retained by the material.

*Lab testing available upon request
