

Description

The Suite® Sterile Goggles are a revolutionary product for the sterile environment. These goggles are single-use to prevent cross contamination at a very cost-effective price. Individually bagged in clean packaging and gamma irradiated to ensure sterility. The gamma irradiated Goggles have an exceptional anti-fog lens along with micro-breathable top vents utilizing direct ventilation for breathable comfort without fogging. They offer see-through peripheral vision, provide a secure comfortable fit and pass all ANSI-Z87.1 standards for safety.
