SUITE® MOP PAD-MESH POCKET

PATENT PENDING

DESCRIPTION

The Suite® Mop Pad with mesh pockets is a high-performance engineered cleaning product made from unique synthetic ultra-fibers. These fibers are non-particulating, snag resistant, and provide an absorptive capacity with unprecedented performance and durability for both cleaning and applying disinfectants.

PRODUCT INFORMATION

Description:

- Absorbent pad mop with mesh pockets. Useful for applying disinfectants on floors in critical environments.

Part Numbers:

- **Non-Sterile:** Y-4PP-515-25
- **Sterile:**
 1. Y-4PP-515-1S
 2. Y-4PP-515-25S
- **Frame:** Y-SSFM-AANK4

Packaging:

- **Non-Sterile:** 5 mops per pack, 25 mops per case
- **Sterile:**
 1. 1 mop per pack, 25 mops per case
 2. 5 mops per pack, 25 mops per case

PRODUCT PERFORMANCE

Test	Method	Result
Sterility	AAMI TIR33:2005	Validated Sterile to a 10 ⁻⁶ Sterility Assurance Level
Particles	Helmke Drum IEST-RP-CC003.4	Category 1 Acceptable for ISO Class 5 Use

Reduction and Transfer: Wiping with Suite material has been demonstrated to *effectively remove surface contamination. In addition, the carry-over (cross contamination potential) after wiping with the Suite material is minimized as contaminants are fully retained by the material.

*Lab testing available upon request.
