

CLEANROOM EQUIPMENT

SUITE® PAD MOP

PATENT PENDING

DESCRIPTION

The Suite® Mop Pad is a high-performance engineered cleaning product made from unique synthetic ultra-fibers. These fibers are non-particulating, snag resistant, and provide an absorptive capacity with unprecedented performance and durability for both cleaning and applying disinfectant.

PRODUCT INFORMATION

Description:

- A thick and absorbent pad mop with pockets. Useful for cleaning or applying disinfectants on walls, ceilings, and floors in cleanrooms and controlled environments.

Part Numbers:

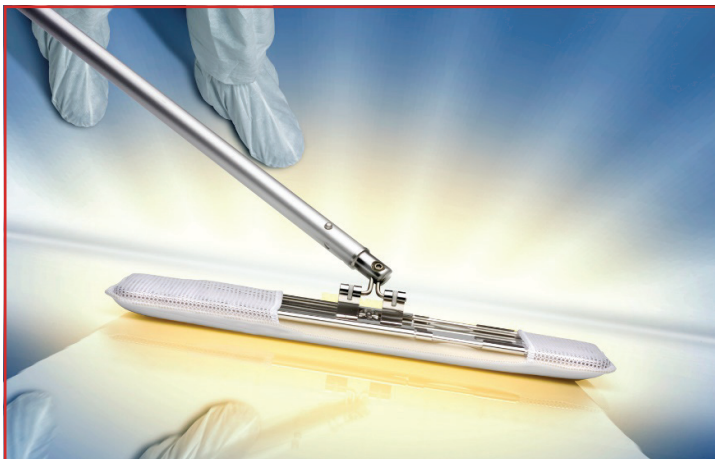

- **Non-Sterile:** Y-GL-PP515-25
- **Sterile:**
 1. Y-GL-PP515-1S
 2. Y-GL-PP515-25S

Size:

- 15" x 5"

Packaging:

- **Non-Sterile:** 5 mops per pack, 25 mops per case
- **Sterile:**
 1. 1 mop per pack, 25 mops per case
 2. 5 mops per pack, 25 mops per case

PRODUCT PERFORMANCE

Test	Method	Result
Sterility	AAMI TIR33:2005	Validated Sterile to a 10 ⁻⁶ Sterility Assurance Level
Particles	Helmke Drum IEST-RP-CC003.4	Category 1 Acceptable for ISO Class 5 Use

Reduction and Transfer: Wiping with Suite material has been demonstrated to *effectively remove surface contamination. In addition, the carry-over (cross contamination potential) after wiping with the Suite material is minimized as contaminants are fully retained by the material.

*Lab testing available upon request.
