

Description

The Suite Mop Pad with mesh pockets is a high-performance engineered cleaning product made from unique synthetic ultra-fibers. These fibers are non-particulating, snag resistant, and provide an absorptive capacity with unprecedented performance and durability for both cleaning and applying disinfectants.

Product Information

- Description: Absorbent pad mop with mesh pockets. Useful for applying disinfectants on floors in critical environments.
- Non-Sterile Part Number:
 - Y-4PP-515-25
 - Packaging: 5 mops per pack, 25 mops per case
- Sterile Part Numbers:
 - Y-4PP-515-1S
 - Packaging: 1 mop per pack, 25 mops per case
 - Y-4PP-515-25S
 - Packaging: 5 mops per pack, 25 mops per case
- Frame: Y-SSFM-AANK4

Product Performance

Test	Method	Result
Sterility	AAMI TIR33:2005	Validated Sterile to a 10 ⁻⁶ Sterility Assurance Level
Particles	Helmke Drum IEST-RP-CC003.4	Category 1 Acceptable for ISO Class 5 use

Reduction and Transfer: Wiping with Suite material has been demonstrated to *effectively remove surface contamination. In addition, the carry-over (cross contamination potential) after wiping with the Suite material is minimized as contaminants are fully retained by the material.

*Lab testing available upon request
