

PRE-SATURATED POLYESTER KNIT WIPES

SPECIFICATION SHEET

DESCRIPTION

These pre-saturated double-knit polyester wipes made from 100% pure, continuous filament, polyester. Its durable construction makes it the ideal choice for cleanrooms and critical manufacturing environments. The high strength polyester yarn is double-knit in an interlocking pattern. The edges are sealed using a proprietary ultrasonic sealing process which improves partible and fiber retention while remaining pyrogen-free.

APPLICATIONS

- These wipes are made from a continuous filament, double knit polyester which allows for consistent application of IPA to critical surfaces and equipment.
- Great in areas where reduced IPA and volatile organic compounds may be necessary.
- Their ultrasonic sealed edge improves fiber and particle retention for improved cleaning in critical environments.
- Compatible with ISO Class 5 Cleanroom Environments.

SPECIFICATIONS

Type

Particles (> 0.5micron)
Particles (> 5micron)
Fibers

Method

Orbital Shake Test
IEST-4.3-6.1.4
IEST-4.3-6.2.2

Results

4.2×10^6
 0.3×10^6
230 fibers/m²

Part Number	W-BP7030-PK99
Size	9" x 9"
Packaging	40 wipes/package, 24 packages/case
Material	100% Pure Polyester Fiber
Solution	70% IPA / 30% WFI DI Water
Basis Weight	140 g/m ²
Compatibility	ISO Class 5 Cleanroom Environments
