

ASEPTIQUIK® L SERIES CONNECTORS

AseptiQuik® L Connectors enable quick and easy sterile connections, in large-volume, high-flow production environments. The large-format, 3/4", 1" hose barb and 1-1/2" sanitary genderless design simplifies system integration and minimizes the risk of operator error. The connectors' robust construction provides reliable performance without the need for clamps, fixtures or tube welders. Biopharmaceutical manufacturers benefit from the interchangeable connection sanitary flow solutions for full-scale bioprocessing production environments with the quality and market availability they expect from the leader in single-use connection technology.

FEATURES

- Genderless
- FLIP-CLICK-PULL
- CPC Click
- Large Internal Diameter
- Chemical Compatibility and pH Range

BENEFITS

- Eases single-use systems specifications with one-part number for both halves
- Intuitive three-step connection process reduces risk of operator error
- Audible confirmation of connection with no additional hardware required
- Fast and efficient fluid transfer of large volumes under low pressures
- AseptiQuik PPSU enables genderless connection for a greater range of chemical applications, offering versatile connections across downstream processes with a pH range from 2 to 12

TYPICAL FLOW RATE:

Cv Value Range: 30 - 57
for AseptiQuik L

Cv values represent the approximate expected flow rate in gallons per minute of water at room temperature for a 1 PSI pressure drop. The flow is generally constrained by the smallest diameter, which in some cases will be the termination diameter and not the Nominal Flow Path.
